Summary

Cybersecurity & Digital Forensics student at Ngee Ann Polytechnic with a minor in Data Analytics & AI. Certified in eJPT and PCEP™, with hands-on experience in penetration testing, SIEM deployment, and AI-driven security.

Education

Ngee Ann Polytechnic Apr. 2024 – Apr. 2027
Diploma in Cybersecurity & Digital Forensics
- Minor in Data Analytics & AI
- cGPA: 3.95/4
- 2nd Most Outstanding Performance (AY25/26)
- Director's List (AY24/25, AY25/26)

St Andrew's School (Secondary) Jan. 2020 – Nov. 2023
GCE Ordinary Level
- Edusave Scholarship 2021 – Top 10% of cohort

Work Experience

DSO National Laboratories Sep. 2026 – Present
MLOps Security Research Intern
- Deploy an Open WebUI Docker container for use by multiple users and integrate Keycloak and Redis to strengthen security.
- Conduct security research on deployed Open WebUI to identify security issues that allow attackers to gain unauthorised access and propose security controls to mitigate security issues.

Certifications & Skills

Certifications
- eLearnSecurity Junior Penetration Tester (eJPT) – INE
- Sentinel Programme – The Digital and Intelligence Service
- PCEP™ – Certified Entry-Level Python Programmer – Python Institute

Skills
- **Technical Skills**: Programming · Red Teaming · Networking · Web Security · Data Analysis · Machine Learning · SOC Operations
- **Programming Languages**: Python · C#

Projects

Chained Evil Twin Wi-Fi Attack | *Kali Linux · WebDAV · Tunneling*
- Executed a full attack chain exploiting Wi-Fi, WebDAV and tunneling to fully compromise a Windows environment.

Job Scam Detector | *Python · Scikit-learn · TensorFlow · Streamlit*
- Machine-learning web app that classifies job postings and recruiter messages as fraudulent or legitimate, returning a confidence score and word-level explanations for each verdict.
- Built the full CRISP-DM pipeline, comparing TF-IDF models (Logistic Regression, Linear SVM) against a Bi-LSTM. The Bi-LSTM was selected on held-out data and reached 0.82 F1 and 0.969 ROC-AUC on the test set.
